Secom Monitoring Fundraiser

Introduction to Clubs

In the business of security we are all about looking after your safety and welfare so it makes sense to support other organisations with similar goals. Secom are getting on board with local Clubs to support fundraising efforts for groups who contribute to our community. We know sports memberships can be cost prohibitive and we want to help you get out and play. While you hit the turf we'll keep watch over your home.

What is...
Alarm Monitoring?

- Alarm monitoring stations are there to receive signals from your security system and act upon them promptly and appropriately.

- They are 24/7 operations and a good station will be highly secure and comply with the NZ /Australian standards for security monitoring centres.

- What action is taken when an alarm goes into activation depends on what instructions you set up when you connect to the service. It usually involves phoning a set of key contacts and/or despatching a guard to investigate.

- In some cases, depending on circumstances they can also despatch emergency services if required.

- Monitoring stations will also notify you if there is a fault reported from your alarm.

My alarm reports to my phone. I don't need professional monitoring...
WRONG!

- Self-monitoring is becoming more popular but it's a convenience feature, not a security feature of most systems.

- Even those of us permanently attached to our phones will be unavailable at some stage, movies, sleeping, meetings, out of coverage – all times when you would miss an alarm event.

- What if you get the message but you are nowhere near home? What can you do?

- That's where monitoring matters, ready and paying attention to your system. Equipped to respond quickly in an emergency.

Choose...
Secom for Monitoring

Secom have an A1 graded monitoring station located in Albany – one of only 3 currently in NZ. Audited and certified to the highest standard – Secom are ready to look after your security now.

Has the alarm been connected to monitoring previously?   **Yes** ☐   **No** ☐   (tick one)

Have you got a telephone land line at the premises?   **Yes** ☐   **No** ☐   (tick one)

If no phone line connected, do you have internet?   **Yes** ☐   **No** ☐   (tick one)

If so what type of connection?

Fixed line broadband ☐   Fibre ☐   Wireless Broadband ☐   No Internet ☐

Pricing

Pricing listed here is quoted excluding GST and is the amount due per calendar month for a fixed term of 12 months. After 12 months you can cancel anytime. We have quoted for standard, single area alarm systems. Larger systems with multiple partitions can be quoted on request. If there is no phone line to connect with and your alarm does not have ability to communicate via internet (built in) we can install an IP/3G comms module – cost for the module would be quoted before going ahead.

Residential Service – standard connection $25.00

Residential Service – connection via Permaconn IP/3G module $30.90

Commercial Property – activation only service via standard connection $25.00

Commercial Property – service including managed schedules $45.00

For other pricing options including commercial 3G connections, multi-partitioned systems, video monitoring and fully managed service – please contact us for a quote.
